PROJECTS

Projects Done by me

❖ Kisan Basket Ecommerce Platform

A customer-centric e-commerce platform developed using Next.js, Tailwind CSS designed to facilitate the online purchase of agricultural products such as fruits, vegetables, aata, and pulses. The application offers a seamless user experience with features like secure user authentication, dynamic product listings, shopping cart functionality, and order management.

❖ School Management Portal

A comprehensive web-based School Management System developed using the MERN stack to streamline administrative and academic processes. The system supports role-based access for Admins, Teachers, Students, and Parents, providing a centralized platform for managing academic records , attendance, class schedules, assignments, and communication.
